

Healthcare Navigation Services

Coordinating streamlined access to treatment for employees who have health issues but are still at work.

ORGANIZATIONAL SOLUTIONS INC.
SOLUTIONS ORGANISATIONNELLES INC.

Supporting employees while they're at work but dealing with physical and mental health issues is important.

Healthcare navigation is an essential service in today's complex environment. With multiple providers, long waiting lists, a variety of treatment protocols, and various insurance plans, it can be challenging for individuals to determine next steps, especially when they're not feeling their best.

Navigation services: the missing link to optimum care

Our recovery facilitators will meet with the individual to discuss their situation and goals, and help them understand their options so they're able to make informed decisions. With their permission, OSI will work within the healthcare system and help remove barriers to timely and effective treatment.

Our recovery facilitators approach each situation with empathy and have the expertise and experience necessary to ensure your employees get the appropriate care throughout their healing journey.

Confidential care and support can include:

- Expedited access to counselling
- Coordination
- Intensive inpatient/outpatient referrals
- Assessment and diagnostic services
- Physical and occupational rehabilitation services
- Community resources and information
- Additional healthcare requests

About OSI

Organizational Solutions Inc. is a proud Canadian success story. Founded in 2003, the company has been built around the overarching vision of providing the right care, at the right time, for the right outcome.

We have a national presence with 21 offices across the country. Wherever you are, we understand the local market.
